Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 1-20, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, filter a pixel of a block by selecting one of a plurality of filtering masks based upon a position of said pixel in said block and averaging said pixel and candidate pixels with said filtering mask.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Wake et al (US 5940536) disclose a technique for reducing ringing noise in which a selection is made between low pass filters of varying strength to be applied to input data based on a determined ringing constant indicating whether or not ringing exists in the vicinity of a target pixel.

Hayashi et al (US 6041145) disclose a technique to reduce block distortion which includes in some aspects of the invention, changing the edge preserving properties of a smoothing filter based on the whether a target pixel is on a block boundary or inside the block.

Lee (US 6226050) and Lee et al (US 6259823) disclose a technique for reducing ringing noise in which a selection is made between average filtering, weighted filtering, and no filtering of a block based on whether the block contains an edge and whether the edge exists at a central pixel.
